FREE GROUND SHIPPING TO THE 48 CONTIGUOUS STATES ON  
PURCHASES OF \$50 or more

ADD \$5 Shipping for Alaska, Hawaii and Canada.

VERILUX NATURAL SPECTRUM STANDARD and FLOOD

## INCANDESCENT LIGHT BULBS

**Verilux Natural Spectrum light bulbs are the closest replication of natural sunlight available. Verilux bulbs contain neodymium, a rare earth element that filters out the excessive yellow part of the spectrum to which our eyes are most sensitive. The result is a healthier, more natural pleasing white light. Ordinary bulbs are very rich in the color yellow, and cause other colors in the spectrum appear dull. Verilux bulbs show colors accurately and increases contrast between black and white, while reducing glare, eyestrain, and fatigue.**

- NATURAL SPECTRUM LIGHT
- SPECIALLY DESIGNED FILAMENT
- 5,000 HOUR LONG LASTING LIFE
- MANUFACTURERS 1 YEAR WARRANTY
- UPLIFTING, CHEERFUL and BRIGHT
- GLASS MADE with PURE NEODYMIUM
- IMPROVES CONTRAST for READING

Natural-spectrum lighting in a fluorescent tube transforms any environment into natural sunlight.

Our Verilux Natural Spectrum Fluorescent tubes provide you with the highest lighting available. They contain a rare blend of phosphors which provides a balanced light for unsurpassed color rendition, visual appeal, and biological activity. The Verilux Natural Spectrum Tubes are an international standard for diurnal lighting, and used in highly acclaimed institutions such as the Smithsonian National Gallery of Art and Sea World.

They are also recognized by indoor gardeners as providing superior results in breeding and raising prize winning Orchids, African Violets and Bonsai.

Verilux Natural Spectrum Light Bulbs last 5,000 hours. Made of hand blown glass, these incredible bulbs are the closest replication of natural sunlight available. Incandescent.

These Verilux bulbs contain neodymium, a rare earth element that filters out the excessive yellow part of the spectrum to which our eyes are most sensitive. Standard base fits most home lighting fixtures.

- Bulbs last up to 5x longer than ordinary bulbs
- Show colors more accurately
- Increase the contrast between black and white
- Reduce glare, eyestrain and fatigue
